# WALL BLOCK

RETAINING WALL BLOCKS FOR ALL SIZED PROJECTS

ST. JOES | SCRANTON

Stacked Stone was chosen for this project to re-contour an area for upgraded sidewalks, ramps and stairs next to an adjacent parking area. Stacked stone was chosen for its outstanding appearance unique in the retaining wall market. Masters also provided the precast step units and fabricated and installed the railings for this project.

# MAGNUM STONE

NATURAL  
STONE FACE

LEDGE FACE

## MASTERS EXCLUSIVE RETAINING WALL SYSTEM SUPERIOR VERSATILITY

The MagnumStone™ retaining wall system was developed with the engineer, designer and installer in mind. MagnumStone's durable, high strength concrete SecureLugs fit into the lower unit's hollow core, allowing significant lateral movement without losing the unit interlock. The wet-cast manufacturing process provides the units with high strength, low absorption and great freeze/thaw results.

Tapered sides make it easy to build tight curves and straight walls with complete accuracy. The MagnumStone's vertical and horizontal hollow core, filled with clear crushed gravel, provides added weight, an excellent wall drainage system and a superb connection with the geosynthetic reinforcements.

OUTSIDE CORNER

INSIDE CORNER

OUTSIDE CURVE

INSIDE CURVE

PLANTABLE WALL

## UNMATCHED BEAUTY | STONE FACE

Every block can be faced with a beautiful stone veneer available in 2 colors. The stone does a masterful job of hiding the staggered seams.

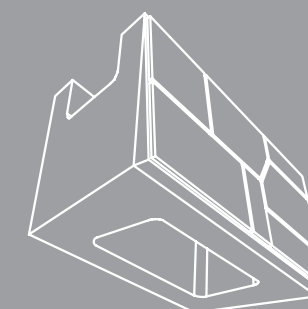

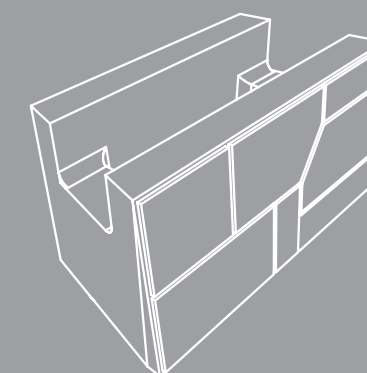

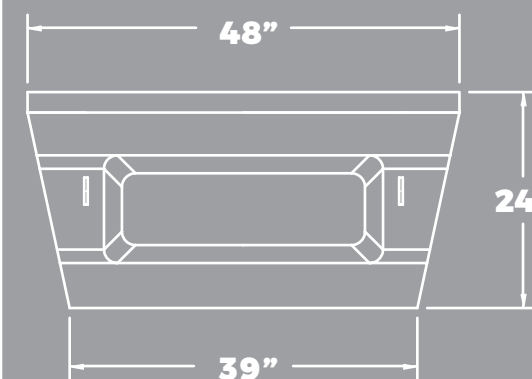

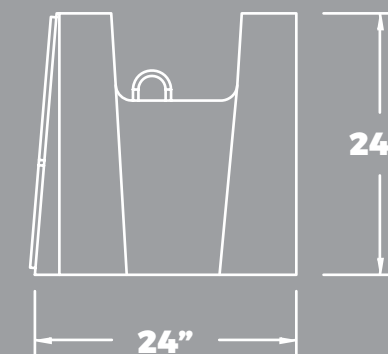

## ALSO AVAILABLE IN LEDGE FACE

## DIMENSIONS

Face Width	48"
Back Width	39"
Depth	24"
Height	24"
Face Area	8 sq. ft.
Weight	1350 lbs

# STACKED STONE

## LARGE SCALE RETAINING WALL SYSTEM

Masters Stacked Stone Bin Blocks - a large Retaining Wall Solution for jobs of all sizes. Our Stacked Stone Blocks are made with Green (fresh) concrete which adds structural stability and color consistency. The unique Stacked Stone face amplifies the traditional beauty of any landscape, while the pattern hides and blurs seams.

## STONE FACED CAPS

We also offer stone textured caps to complete and compliment the Stacked Stone Bin-Block.

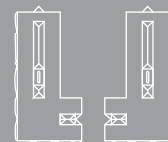

## ENGINEERED FOR EASE

Keyways, male and female, along with inset lifting hooks aid with alignment and placement.

## DIMENSIONS

6' x 2' x 2' 3' x 2' x 2' 6' L Corners

# DIAMOND WALL SYSTEM

## DIAMOND / PRO

The Diamond Pro® retaining wall system is an ideal choice for large-scale projects. With a rough-hewn face, the Diamond Pro Stone Cut® product gives landscapes substance and stability.

# LIBERTY STONE

## FORTUS SYSTEM

Ideal for everything from residential landscaping to commercial projects, Fortus Square Foot's beautiful and distinctive color blends are unsurpassed in the industry and feature a perfect combination of beauty and strength. Bring your dreams to reality through Fortus Square Foot's maximum layout creativity when building curves, corners and angles as well as set-back or near-vertical walls. Due to its patented SecureLug™ Variable Connection System, The Fortus Square Foot™ system combines durable, precast concrete with incredible ease of installation.

## STONEVISTA

The single sided splitface Stonevista 6" Standard unit is extremely versatile for retaining walls of all sizes using either near vertical or set-back applications. At 6"x18" it provides the installer with a tremendous advantage compared with many 6" high products on the market today, allowing the unit to cover more Sq. Footage with every unit placed.

## CHATEAU WALL

Chateau Wall is finished on all sides making it the perfect choice for double sided applications. With Chateau Wall, you can create effortless pillars, benches, or a custom outdoor kitchen. Chateau Wall's versatile design allows for endless possibilities, while ease of installation makes it the ideal choice for both professional and novice installers.

## GARDEN WALL

Features unique handholds for ease of placement, as well as a rear lip for interlocking and setback.

# WALL & COLUMN CAPS

## QUARRY WALL CAPS

Quarry Wall Caps provide the most natural looking wall cap and are available in a range of sizes. Finish any wall, stone, paver, or system, with the natural look of stone. Caps feature desirable rough hewn edges and textured surfaces.

# STEP UNITS

PRECAST UNITS / PERM-ENTRY / BILCO / STAKWEL / DECORATIVE

POCONOS DEVELOPMENT

Masters Concrete Step Units is the preferred manufacturer, supplier, and installer for many developments throughout the region. Our superior step units and attention to detail make Masters Concrete Step Units your one stop shop.

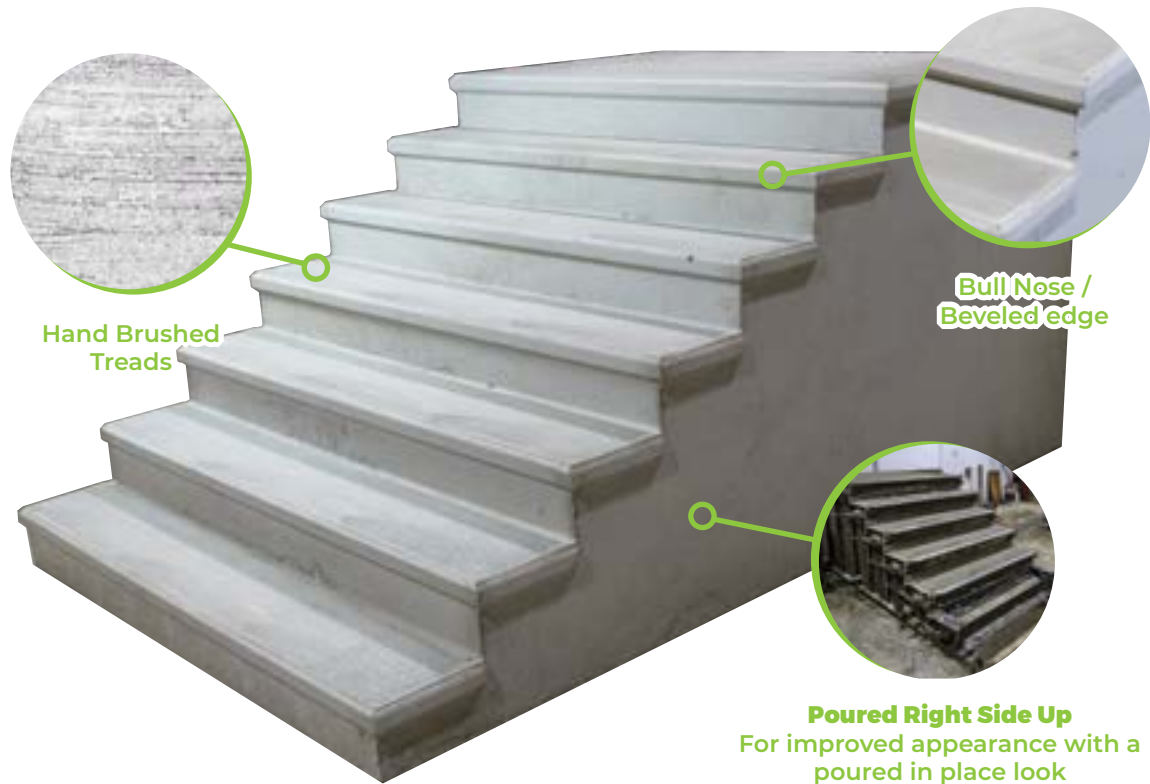

SUPERIOR ENGINEERING

Precast concrete steps are a staple of Masters due to their durability, custom dimensions, and timely production process. With over 100 different size configurations, you will find the right precast concrete steps and stairs here at Masters. No matter what kind of precast concrete steps you need, we'll meet your requirements and exceed all expectations.

Each step unit tread has a hand troweled brush finish to give it a custom poured in place look.

Units are delivered and installed promptly for immediate use. No forming, pouring, wasted time, or messy clean up. The result is you pocket the savings.

Every tread and riser is engineered to exact uniform dimensions to satisfy rigid building requirements. Safety beveled steps reduce wear. Custom brush finish assures greater grip in slippery weather.

INSTALLATION OPTIONS

Any demo or site prep work is the customers responsibility. MCSU will install step unit on one of the following:

Concrete Footer (provided by customer)

Block Footing (not responsible for settling of step)

Concrete Wingwalls (brackets extra charge)

Plates & Blocks (extra charge)

## BILCO DOOR SYSTEMS

Bilco basement doors allow homeowners to add code-compliant living space or storage areas to their home. Large items such as games tables and furniture for finished areas, or pool supplies and patio furniture for storage areas, move easily through the wide opening of a Bilco door.

## OPEN YOUR BASEMENT

The PermEntry Basement Entrance adds sales appeal and value by giving homeowners access directly from the basement to the outdoors. When you plan for a PermEntry Basement Entrance, you open up your basement to a number of opportunities.

PermEntry Size	Footing to Grade
S	35" - 41"
O	52" - 58"
B	59" - 66"
C*	67" - 74"
D*	75" - 82"
E*	83" - 91"
F*	92" - 99"

## STAKWEL

This modular system is one of the fastest and least expensive ways to add code-compliant emergency egress to any basement area. Simply "stack" the modules to accommodate your foundation height and add natural daylight to your finished basement. Watch how easy it is to add emergency egress to your home.

## NATURAL LEDGE STEPS

From our custom molds inspired by mountain rock and field stone this 4 piece collection - each having distinctive characteristics of their own - can be stepped back, rotated, and positioned in dozens of ways.

Up to 8 different face & edge textures and be utilized to build a stair case of inimitable appearance.

**DIMENSIONS** 3' x 4' irregular size

## QUARRY STEPS & LANDING

Our Quarry Steps are made under the most stringent standards and are steel reinforced so that you need only enjoy. With heavy Chiseled textures on three sides, these steps can be used with a retaining wall or just as easily stand out on their own.

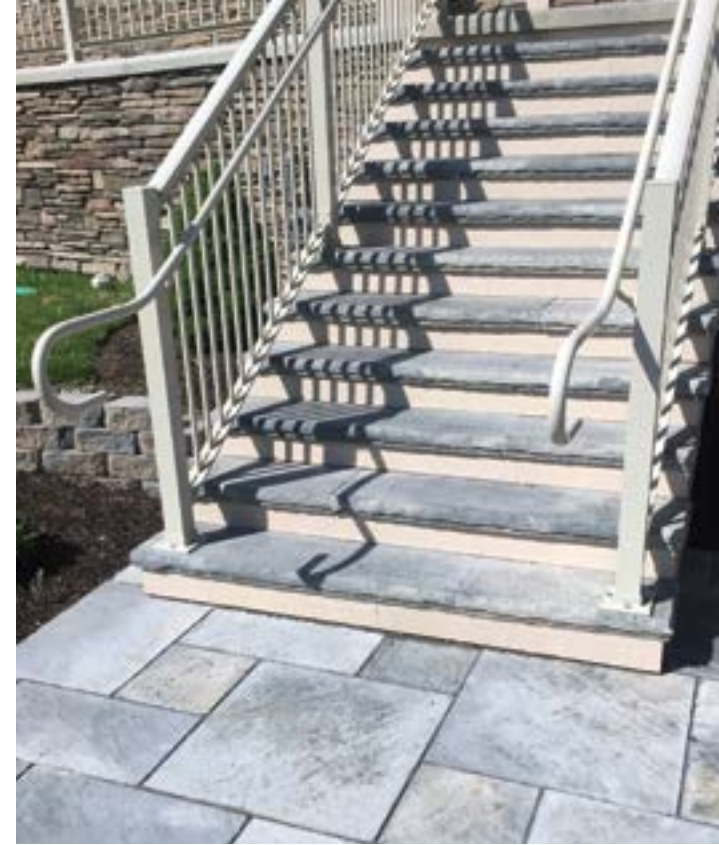

An amazing 3' by 4' or 6' Quarry Stone Landing Step that blends perfectly with our existing 4' & 6' Quarry Stone Steps. A landing step size of 72" x 30" makes a dramatic statement that upgrades any entryway.

## DIMENSIONS

**Steps**  
3' x 6" x 16"  
4' x 6" x 16"  
6' x 6" x 16"

**Landing Steps**  
6' x 6" x 30"

## QUARRY TREADS

Features the same build standards as our Quarry Steps but in a 2.5" form factor.

## DIMENSIONS

4' x 2.5" x 14"

## STONEWOOD BEAM

A palette of our 4' long Stonewood Beam can easily be shifted into a set of steps. Mix and match with other step kits for a completely distinctive wood and stone look.

# UTILITY

COMMERCIAL / RESIDENTIAL / CUSTOM

PIERFECTION

Sono-tubes are a pain, they get wet & soggy losing shape; building forms is time consuming and pouring concrete can be difficult and messy. Then you lose time waiting for the concrete to set. And finally you have to wait for an inspection before moving on with the job.

Masters offers the Pierfect solution - our high quality, high strength Precast Piers. We have 4 standard types to choose from and will custom build to your specs.

## A COMPLETE LINE FOR WASTE WATER

Discover the world of waste water utility items available from Masters Concrete Step Units.

Whether you're in need of a simple Septic Tank, grate or a complete series of man holes and water management - Masters has the solution.

The same quality materials and craftsmanship used in our concrete step units is masterfully applied to our waste water utility offerings.

## SEPTIC TANKS

Septic tanks just aren't that glamorous, but we are excited to announce our New Low Profile Tank. Our new low profile tank is lower so you don't have to dig as deep. Also, for the first time, Masters will be offering pump packages with the tanks simplifying how you buy your materials. With our newly expanded fleet of delivery equipment with increased capacities, you can be sure to get your precast materials when you need them to keep your job on schedule.

- **1000 gallon tank with removable baffle**
- **Low profile design**
- **Increased wall thickness for durability**
- **Optional pump packages available**
- **Fleet to get the job done**
- **Experienced Drivers**
- **Single or double compartment**
- **Multiple tank size options**

# FABRICATION & RAIL

STOCK / CUSTOM

## ORNAMENTAL • INDUSTRIAL • FUNCTIONAL THE FINISHING TOUCHES

Nothing completes a job quite like a nice railing. At Masters Fabrication & Rail we offer a complete variety of ornamental wrought iron and commercial railing that add safety and value to your property.

Masters Fabrication and Rail offers *all stock and custom rail with a Powder Coated finish*. Powder coating is an advanced method of applying a decorative and protective finish and is the best method to ensure durability, weather resistance, and color retention. You will have confidence in a finish that is Salt Water & UV resistant and is virtually maintenance free – no yearly painting required! Stock rail is available in a standard black finish, but don't worry we have many custom color options available!

Our rail also meets all ICC codes.

# MATERIALS & SUPPLIES

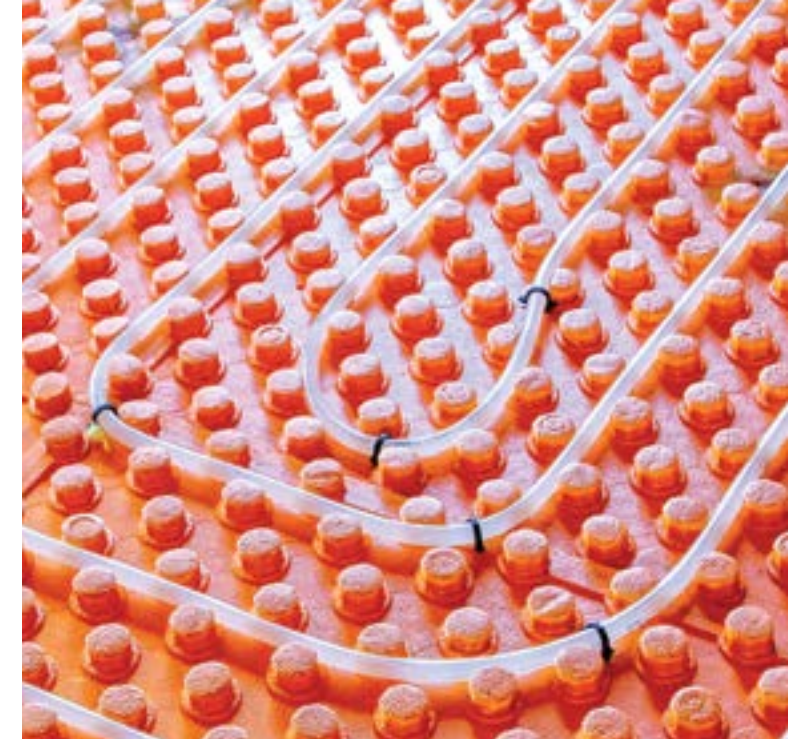

CREATHERM / NUDURA / BLANKETS

## CREATHERM

Radiant heat does a few things very well. By warming the floor and objects in the room, rather than trying to heat the air and then push it around your house, it's more effective and efficient. It also creates a healthier environment by improving indoor air quality and creating an environment that is less conducive to mold, bacteria, viruses and dust mites.

- Reduced operating costs
- Reduced environmental impact through efficient heating
- Promotes healthier environment, including reducing allergens
- More comfortable feeling home
- Can be used efficiently in outdoor areas

## NUDURA

By using NUDURA Insulated Concrete Forms (ICF) to build your next home you can ensure you are choosing the best building solution available today. Insulated Concrete Forms provide Substantial benefits over traditional building methods. The combination of rising energy requirements and rising fuel costs, mean that we need to make the most of building technology to heat and cool our homes. This requires a whole building approach to design, which doesn't have to be complicated. NUDURA Insulated concrete forms are energy efficient construction materials that provide maximum comfort and energy solutions for your entire home.

## CURING BLANKETS

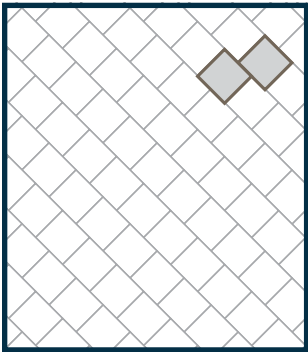

When placing concrete in cold weather, protecting the asset (the concrete) is not optional. For years now, experts have used insulated blankets to both protect the concrete and speed the curing process at the same time. Concrete cures due to a chemical reaction that generates heat as a byproduct, so insulating the concrete allows the heat to be trapped and used to aid in the curing process. Concrete cures fastest in very warm conditions, Therefore this makes the use of an insulated blanket a practical and theoretically sound practice.

PRODUCT INFORMATION

MATERIALS

Masters pieces are made from natural materials. Some color variations can be expected. There is no guarantee for perfect color matching.

EFFLORESCENCE

Efflorescence is a white powder-like deposit common in all concrete products. Efflorescence will disappear naturally in time with weathering. This natural occurrence will not affect the structural integrity of our product. MCP assumes no responsibility or liability for this occurrence.

WARNING

MCP Products are intended for walkways and patios only. Under no circumstances should they be used where they could incur vehicular traffic! With the exception of Euro Cobble Pavers.

PRODUCT INSTALLATION

BASE PREPARATION

1. Remove topsoil from the area to be paved.
2. Base materials should be 2A Modified to be placed in a 6" layer. The thickness of base will vary with the type of soil sub grade and climate. Colder climates may require thicker bases.
3. The base layer should be thoroughly compacted with enough water to aid compaction, increase density and also control dust.
4. Once the desired compaction has been achieved place a 1" bedding layer of concrete sand on top, ensuring that the base is level by using a string line or screed board.
5. Patios should be laid with slope to drain off rain water. This slope (away from buildings) is normally a drop of 1 " for each yard in length.

LAYING THE PATIO

1. Choose the design that you wish to lay, then starting in a corner carefully place the first slab in position and gently tap down using rubber mallet.
2. The bedding layer of loose concrete sand allows for leveling the surface of each slab which may vary from piece to piece due to their texture.
3. Slabs may be laid with up to 1/2" joints and filled with dry sand on completion of installation.

Under no circumstances should a mechanical compactor be used directly on the slab surface.
